Majumdaar Hosiery ERP

Staff Handbook

How to fill in the master lists, how material moves through the ERP from buying yarn to finished rolls in the godown (explained step by step with one real example), and how the rest of the business is kept: customers, money, staff and GST.

CONTENTS

1. **Masters**: what they are and the order to fill them
2. Units
3. Locations (stores, godowns, agencies)
4. Items (materials and products)
5. Parties (suppliers, customers and agencies)
6. Machines
7. Processes (standard rates)
8. BOM / Recipes
9. Party Price List
10. **Workflow**: yarn purchase to finished rolls, 7 steps
11. What the ERP shows you at the end
12. Selling the finished lot
13. Paying the agencies
14. Keeping track of the agencies
15. Godowns
16. Customers, leads and quotations
17. Money: bank, cash, expenses, bills, EMIs
18. Staff, attendance and salary
19. GST reports, approvals and the activity log
20. Quick fixes for common messages
21. Who does what

For all staff using the ERP

Boxes marked * must be filled in

PART 1

Masters: the fixed lists

Masters are the lists the ERP uses everywhere: your materials, your suppliers and customers, and the agencies that knit, dye and finish for you. Fill them in once; after that every screen lets you pick from a list instead of typing, and rates, GST and job charges fill in automatically.

Fill them in this order (each one uses the ones before it)

1. **Units**: already filled (Kg, Nos, Roll…). Add only if you need a new one.
2. **Locations**: the stores are already there; each agency gets its own when you add it as a party.
3. **Items**: all your materials and products.
4. **Parties**: suppliers, customers and **job-work agencies** (knitting, dyeing, finishing).
5. **Machines**: optional; knitting and dyeing machines.
6. **Processes**: standard rates per kg (3 are already there), used when an agency has no rate of its own.
7. **BOM / Recipes**: dye recipes and packing standards.
8. **Party Price List** (under Sales): special prices for customers.

> **Who can fill Masters:** Admin, Management, Purchase, Sales and Data Entry logins. Factory logins (Knitting, Dyeing, Finishing, Store) can see the lists but cannot change them.

1 Units

How you count things. Already there: **Kg, Nos, Roll, Mtr, Ltr, Pcs, Box**.

Masters → Units → + New unit

BOX	WHAT TO WRITE	EXAMPLE
Symbol *	Short form	*Dz*
Unit name	Full name	*Dozen*

2 Locations

The places where stock is kept. Stock is always counted **per place**, so the ERP knows how much yarn is in your store and how much is lying at each agency.

PLACE	WHAT IS KEPT THERE
Main Store	Yarn, dyes & chemicals, packing material as received
Each agency (made by itself)	Your material lying with that agency: yarn issued to a knitter, grey fabric at a dyeing house, dyed fabric at a finisher. Named after the agency; it appears when you add the agency in Parties
Finished Goods Store	Packed rolls ready to sell
Godown 2, Godown 3 … (you add them)	More places for finished rolls: a second godown, a customer-ready stock area. Rolls can be finished into, moved between and sold from any godown
Knitting Factory, **Color Factory**	Only for work done in **your own** factory. If all work goes to agencies, open them and tick **Not in use** so they stay out of the lists

Add a location yourself for another godown (type **Godown**) or another raw-material store (type **Store**).

Masters → Locations & Godowns → + New location

BOX	WHAT TO WRITE	EXAMPLE
Location name *	The place	*Godown 2 (Burrabazar)*
Type	Godown (finished goods), Store (raw material), Factory or Job Worker	*Godown*

Not in use	Tick to hide it on the entry screens	—
Remarks	Anything useful	*Extra yarn storage*

3 Items: materials and products

Every material you buy, make or sell, from yarn and dyes to the finished rolls you sell.

Masters → Items → + New item

BOX	WHAT TO WRITE	EXAMPLE
Item code	Your own short code (optional, but handy for searching)	*Y30*
Item name *	Full name, the way you say it	*Cotton Yarn 30s Combed*
Category *	What kind of material; see the next table. **Very important.**	*Yarn*
Unit *	How you count it	*Kg*
HSN code	From the supplier's bill or your CA	*5205*
GST %	Its GST rate	*5*
Standard rate (₹)	Usual price. Fills in purchase orders (bought items) or invoices (products)	*245*
Re-order level	Optional. Shows a **Low** alert when stock falls below this	*500*
Description	Quality details, if any	*100% cotton, combed*

The category decides where the item shows up

CATEGORY	PUT HERE	IT APPEARS IN
Yarn	All yarns: cotton, lycra, silk…	Purchase, yarn issue, knitting
Dyes & Chemicals	Dyes, soda ash, salt, softener	Purchase, dyeing, dye recipes
Packing Material	Poly bags, paper tubes, tape	Purchase, finishing & packing, packing recipes
Others	Anything else you buy	Purchase
Grey Fabric	Fabric straight off the knitting machine	Knitting output, send grey for dyeing, dyeing input
Colored Fabric	Fabric after dyeing	Dyeing output, finishing input
Finished Goods	Packed fabric you sell	Finishing output, sales order, challan, invoice

Create the whole chain for every product you make. For example: Cotton Yarn 30s (**Yarn**) → Grey Single Jersey 30s (**Grey Fabric**) → Dyed Single Jersey 30s (**Colored Fabric**) → Finished Single Jersey 30s (**Finished Goods**).

Creating an item does not add stock. Stock comes in through **Purchase → Goods Receipt (GRN)** when you buy, or **Inventory → Opening / Adjustment** for stock you already have.

4 Parties: suppliers, customers and agencies

Everyone you buy from or sell to, and every **agency** that knits, dyes or finishes for you (you may have several for each kind of work).

Masters → Parties → + New party (or Customers → Customer Master: same list)

BOX	WHAT TO WRITE	EXAMPLE
Party name *	Business name	*Kolkata Garments Pvt Ltd*
Type *	**Supplier** (you buy from them) · **Customer** (you sell to them) · **Job Worker** (an agency that knits, dyes or finishes for you) · **Both**	*Customer*
Contact person	Who you talk to	*Mr. Sen*

Phone / Email	Contact details	*+91 98300 12345*
State *	Pick from the list. **Decides the GST type**	*West Bengal*
GSTIN	Their 15-character GST number; leave empty if unregistered	*19AAACK4444D1Z4*
City / Address	Printed on invoices and challans	*Kolkata*
Credit limit (₹)	Customers: the most they may owe you	*5,00,000*
Credit days	Customers: days they get to pay	*30*
Opening balance (₹)	What was owed when you started using the ERP	*25,000*
Dr / Cr	**Dr** = they owe you · **Cr** = you owe them	*Dr*
Does knitting / dyeing / finishing	Agencies: tick the work this agency does for you. Tick both dyeing and finishing for a dyeing house that also finishes	*Does knitting*
Knitting / Dyeing / Finishing rate (₹/kg)	Agencies: what it charges per kg for that work. Fills the job charges on each entry	*9*

Agencies: when you save an agency, the ERP gives it a **place of its own** in Locations, named after it. Yarn you issue to it, and fabric sent to it, is counted there until it comes back as the next stage. Its **job charges** (rate × kg) are added to its account by themselves; you pay it in **Finance & Accounts → Supplier Payments**, like a supplier.

Why State and GSTIN matter: same state as you → the invoice charges **CGST + SGST**; another state → **IGST**. The first two digits of a GSTIN must match the state code (West Bengal = 19); the ERP warns you if they don't. When an invoice would take a customer above their **credit limit**, the ERP asks you to confirm before saving.

5 Machines

Optional: knitting and dyeing machines, if you want to note the machine on an entry.

Masters → Machines → + New machine

BOX	WHAT TO WRITE	EXAMPLE
Machine code *	Your own number	*KM-01*
Description	What it is	*Single Jersey 30" 24G*
Used for	Knitting, Dyeing, Finishing or Other	*Knitting*
Diameter / Gauge	Machine dia and needle gauge	*30" / 24G*
Feeders	Number of feeders	*90*
Capacity	Output per day or per batch	*350 kg/day*
Status	Running, Idle or Under maintenance	*Running*

6 Processes: standard rates

A standard rate per kg for each stage. Each agency's **own rate** (on its party record) comes first; this one is used when an agency has none, and for work in your own factory. The ERP uses the rate to **calculate job charges automatically**, and they go into your **cost per kg**. Already there: Knitting ₹8/kg, Dyeing ₹15/kg, Finishing & Packing ₹6/kg.

Masters → Processes

BOX	WHAT TO WRITE	EXAMPLE
Process name *	Name	*Knitting*
Stage *	Knitting, Dyeing or Finishing	*Knitting*
Standard rate (₹/kg)	The usual rate per kg	*8*

STAGE	JOB CHARGES ARE WORKED OUT AS
Knitting	rate × **kg of grey fabric produced**

Dyeing	rate × **kg of grey fabric put in**
Finishing	rate × **kg of finished fabric**

You can always change the job charges in a particular entry, for example to a fixed lump sum.

7 BOM / Recipes

A standard list of materials **for 1 kg of fabric**. Picking a recipe in a dyeing or finishing entry fills in all the dyes, chemicals or packing for you, multiplied by the kg.

Masters → BOM / Recipes → + New recipe

BOX	WHAT TO WRITE	EXAMPLE
Recipe name *	A name you'll recognise	*Red Reactive Recipe*
Stage *	**Dyeing** (dye recipes) or **Finishing** (packing standard)	*Dyeing*
For output item	The fabric it produces (optional)	*Dyed Single Jersey 30s*
Expected wastage %	Normal loss, for reference	*3*
Materials per 1 kg	One line per material, with the quantity for **1 kg** of fabric	*see below*

EXAMPLE DYE RECIPE: ITEM	QTY PER 1 KG	FOR 585 KG THE ERP FILLS IN
Reactive Red ME4BL	0.03	17.55 kg
Soda Ash	0.1	58.5 kg
Glauber Salt	0.5	292.5 kg
Silicone Softener	0.02	11.7 kg

Only these appear in recipes: Dyes & Chemicals, Packing Material and Others. Yarn is entered directly in each knitting entry.

8 Party Price List

Special prices for particular customers. When you make a sales order or invoice for that customer, **their rate fills in automatically**.

Sales → Party Price List → + New price

BOX	WHAT TO WRITE	EXAMPLE
Customer *	Pick the customer	*Kolkata Garments Pvt Ltd*
Item *	A Finished Goods item	*Finished Single Jersey 30s*
Rate (₹/kg) *	Their price	*420*
Effective from	Date the price starts	*01-10-2026*

When a price changes, **add a new line with the new date**; the ERP always uses the latest. Customers without a special price get the item's standard rate.

Good to know

- **No duplicates.** Two items, parties or machines cannot have the same name; the ERP tells you if one exists.
- **Used records cannot be deleted.** Once an item or party is used in an entry it is protected. You can still **edit** it (spelling, phone number…).
- **Changes apply going forward.** A new rate, GST % or agency rate affects new entries; saved entries keep their values.
- **Search and sort:** every list has a search box; click a column heading to sort.

PART 2

From yarn purchase to finished rolls

One real example all the way through: you buy **1,000 kg** of Cotton Yarn 30s, send **600 kg** to the knitting agency **Maa Tara Knitting**, have it dyed **Red** and finished by **Bengal Dyeing House**, and end up with **560 kg / 24 rolls** of finished fabric.

The material moves through your store and the agencies, one entry at a time

Main Store
yarn, dyes, packing

Knitting agency
yarn → grey fabric

Dyeing / finishing agency
grey → dyed → finished

Finished Goods Store
finished rolls

#	STEP	WHO DOES IT	WHAT HAPPENS
1	Purchase Order	Purchase	You order yarn from the supplier
2	Goods Receipt (GRN)	Store	Yarn arrives at the **Main Store** and gets its **lot number** (L-0001)
3	Purchase Bill	Purchase / Accounts	Supplier's bill recorded (money only)
4	Yarn Issue to Knitting	Store	Yarn sent to the **knitting agency** with a job work challan
5	Knitting	Knitting	The agency's **grey fabric** is recorded with the **same lot number**, and goes **straight to the dyeing agency**
6	Dyeing	Dyeing	The dyeing agency turns grey into **coloured fabric**
7	Finishing & Packing	Finishing	The finishing agency's **finished rolls** come into the Finished Goods Store

Golden rule: each step can only use what the **previous step** put there, at that agency. If a list says **"no stock here"**, the step before it has not been done yet, or the material was sent to another agency.

One lot number, start to finish: the ERP gives the lot number **once, on the GRN** (L-0001, L-0002 ...). Nobody types it. Yarn issue, knitting, dyeing, finishing and the challan all pick that same number from a list, so lot L-0001 is the same lot from the supplier's yarn to the customer's invoice.

Before you start: the items in the example must exist in Masters → Items (Cotton Yarn 30s = Yarn, Grey Single Jersey 30s = Grey Fabric, Dyed Single Jersey 30s = Colored Fabric, Finished Single Jersey 30s = Finished Goods, plus your dyes, chemicals and packing). Add the supplier and both agencies in Masters → Parties: **Maa Tara Knitting** (Job Worker, tick *Does knitting*, rate 9) and **Bengal Dyeing House** (Job Worker, tick *Does dyeing* rate 15 and *Does finishing* rate 6).

1 Purchase Order

Purchase · optional but recommended

Purchase → Purchase Orders → + New

BOX	FILL
Supplier	Shree Spinning Mills
Item line	Cotton Yarn 30s · Qty **1000**. Rate and GST fill in by themselves

STOCK AFTER THIS STEP

Nothing moves yet	It is only an order

2 Goods Receipt (GRN): yarn arrives

Store

Purchase → Goods Receipt (GRN) → + New

BOX	FILL
Supplier	Shree Spinning Mills
Against PO	Pick the PO. The lines fill in by themselves
Lot no	Nothing to type. It shows *new on save*, and the yarn gets **L-0001** when you save. Dyes, chemicals and packing show *no lot*
Received at	**Main Store**
Supplier challan no	From their delivery paper

STOCK AFTER THIS STEP

Main Store	**1,000 kg** Cotton Yarn, lot **L-0001**

If you supply the **dyes, chemicals and packing material** to the agencies, buy them the same way (steps 1 and 2). If the agencies use their own, skip this: their rate covers it.

3 Purchase Bill: money only

Purchase / Accounts

Purchase → Purchase Bills → + New

Pick the supplier, type their **bill number** and choose **Against GRN**. Lines and GST fill in by themselves. This records what you **owe** the supplier; it does not move any stock.

4 Yarn Issue to Knitting

Store

Inventory → Yarn Issue to Knitting → + New

BOX	FILL
Knitting agency	**Maa Tara Knitting**
Item	Cotton Yarn 30s
Yarn lot	**L-0001 — 1000 Kg** (the list shows what is in the Main Store)
Qty (kg)	**600**

STOCK AFTER THIS STEP

Main Store	400 kg yarn
Maa Tara Knitting	**600 kg** yarn, lot L-0001 (still yours, held by the agency)

Click **Print**: it prints as a **job work delivery challan** with the agency's name, address and GSTIN, to send with the yarn.

5 Knitting: yarn becomes grey fabric

Knitting

Production → Knitting → + New

BOX	FILL
Agency / unit	**Maa Tara Knitting**. Its job rate fills in (₹9/kg), and the yarn list shows only the yarn issued to it
Yarn consumed	Cotton Yarn 30s · lot **L-0001** · **600 kg**
Lot no	Fills in by itself from the yarn: **L-0001**. With two yarns (e.g. cotton + Lycra) it takes the lot of the one with the most kg
Grey fabric produced	Grey Single Jersey 30s
Output qty (kg) / Rolls	**585** / **25**
GSM / Dia	160 / 30" (optional)
Grey fabric sent to	The dyeing agency it goes to: **Bengal Dyeing House**

The ERP fills in by itself:

- **Wastage** 600 − 585 = **15 kg** (2.5%). Change it if the real waste was different.
- **Job charges** ₹9 × 585 kg = **₹5,265**, added to Maa Tara Knitting's account.

STOCK AFTER THIS STEP

Maa Tara Knitting	Yarn used up (600 kg)
Bengal Dyeing House	**585 kg / 25 rolls** grey fabric, lot **L-0001**, ready to dye. **No transfer entry needed**

Knitter keeping the fabric for now? Choose **Maa Tara Knitting** itself in "Grey fabric sent to". Send it later with **Inventory → Send Grey for Dyeing**.

6 Dyeing: grey becomes coloured

Dyeing

Production → Dyeing / Coloring → + New

BOX	FILL
Agency / unit	**Bengal Dyeing House**. Its rate fills in (₹15/kg)
Grey fabric	Grey Single Jersey 30s
Lot no	**L-0001** (the list shows the lots lying at this agency). Input qty fills in as **585**
Color / Shade	Red
Dye recipe	Only if **you supply** the dyes & chemicals: pick one and they fill in for 585 kg, taken from the **Main Store**. If the agency uses its own, leave the table empty
Colored fabric produced	Dyed Single Jersey 30s
Output qty (kg)	**570**
Dyed fabric sent to	Fills in as **Bengal Dyeing House** because it also finishes. For a separate finishing agency, choose that one

The ERP fills in by itself: wastage **15 kg**, job charges ₹15 × 585 = **₹8,775**.

STOCK AFTER THIS STEP

Bengal Dyeing House	**570 kg** dyed fabric, lot L-0001 (Red)
Main Store	Dyes & chemicals reduced by what you supplied

7 Finishing & Packing: finished goods (roll / kg)

Finishing

Production → Finishing & Packing → + New

BOX	FILL
Agency / unit	**Bengal Dyeing House**. Its finishing rate fills in (₹6/kg)
Colored fabric	Dyed Single Jersey 30s
Lot no	**L-0001**. Input qty fills in as **570**
Finish	Compacting (or your finish)
Packing material	Only if **you supply** it: poly bag **24**, paper tube **24** (or pick a packing recipe)
Finished goods produced	Finished Single Jersey 30s
Output qty (kg) / Rolls	**560** / **24**. Rolls fill in from the dyed lot; just count them, nobody needs to weigh each roll
Meters	**2200** (optional; gives you cost per meter)
Quality	A

The ERP fills in by itself: wastage **10 kg**, job charges ₹6 × 560 = **₹3,360**.

FINAL STOCK	
Finished Goods Store	**560 kg / 24 rolls** Finished Single Jersey, lot **L-0001**, ready to sell

Done: 600 kg of yarn has become **560 kg / 24 rolls** of finished fabric, lot **L-0001**. That is a **93.3% yield**, with 40 kg of wastage recorded across the three stages.

PART 3

Results, selling and quick fixes

Where to see what the lot cost and where it is, how to sell it, and what to do when the ERP shows a message.

A What the ERP shows you at the end

WHERE TO LOOK	WHAT YOU SEE
Inventory → Stock Summary (Finished Goods Store)	560 kg / 24 rolls, lot L-0001, with its value
Costing → Lot Costing Sheet	The exact cost of lot L-0001: yarn + dyes + packing + all job charges + overheads + wastage = **cost per kg, per roll, per meter**
Production → Agency Summary	For every agency: material lying there now, kg taken in and delivered, wastage %, job charges and what you owe it. Click an agency to see its lots
Production → Batch / Lot Tracking	Lot L-0001 from the supplier's GRN (1,000 kg received) → 600 kg yarn knitted → 585 grey → 570 dyed → 560 finished = **93.3% yield**, then kg sold and kg left
Wastage → Wastage Report	Knitting 15 kg, dyeing 15 kg, finishing 10 kg, with their value

For accurate costing also enter each month's electricity bill (**Finance & Accounts → Electricity Bills**) and factory expenses such as rent and repairs (**Expenses**, with *Add to production cost* ticked). The ERP spreads them over the kilograms finished that month.

B Selling the finished lot

#	SCREEN	WHAT TO DO
1	**Sales → Quotations** (optional)	Prices offered, to a customer or to a new prospect. When the order comes, choose it on the sales order to copy its lines
2	**Sales → Sales Orders**	Customer, colour and quantity in kg, or in rolls only (the kg is then estimated at 17 kg a roll). The rate fills in from the Party Price List. The ERP warns you if the customer's credit limit would be crossed
3	**Sales → Delivery Challans**	Pick the sales order; pending quantity fills in. Choose the godown, lot **L-0001** and the kg sent: the rolls fill in at the lot's average (560 kg in 24 rolls: 70 kg = 3 rolls). Stock leaves that godown
4	**Sales → Invoices**	Pick the challan; everything fills in. GST is worked out automatically (CGST + SGST or IGST). Click **Print** for the tax invoice. The invoice list shows what is paid and the balance of each invoice
5	**CRM → Payment Receipts**	When the customer pays: amount and mode, then the details the mode asks for: cheque no., date and bank; UPI phone or ID; UTR no. Paid in two ways (₹20,000 cash + ₹30,000 bank)? List both parts in the table below; the amount adds up by itself. What is not paid stays on credit

C Paying the agencies

Every knitting, dyeing and finishing entry adds its **job charges** to that agency's account by itself. In the example, Maa Tara Knitting is owed **₹5,265** and Bengal Dyeing House **₹12,135** (₹8,775 dyeing + ₹3,360 finishing).

WHERE	WHAT TO DO
Finance & Accounts → Payables	What you owe every supplier and agency
Finance & Accounts → Party Ledger	One agency's charges, lot by lot, and the payments made
Finance & Accounts → Supplier Payments	Pay the agency: pick it, its current balance shows, type the amount

Labour Payments / Labour Payable are only for workers in your own factory. Agencies are always paid through **Supplier Payments**.

D Keeping track of the agencies

Put an **expected delivery date** (and the expected fabric, rate, colour wanted) on the yarn issue and on Send Grey for Dyeing. Then:

WHERE	WHAT YOU SEE
Production → Job Work Register	Every send to an agency: kg sent, kg already worked, kg still there, expected date and **Overdue** when it is late. Late sends also show on the dashboard
Production → Processing Status	Every lot at a dyeing or finishing agency: 🟡 material sent → 🔵 processing started → 🟠 colouring → 🟣 finishing → 🟢 finished & ready → ✅ received. Sent, dyed and received move by themselves
Production → Status Updates	When the agency tells you a step in between, record it: agency, lot, status. Or click the lot on the Processing Status page
Inventory → Yarn Stock	Per yarn: opening, purchased, sent to knitting, used in knitting, available in the store and lying at the knitting houses

E Godowns

WHERE	WHAT TO DO
Masters → Locations & Godowns	Add each godown once, type **Godown**
Finishing & Packing	*Finished rolls go to*: the godown that receives them
Inventory → Godown Transfer	From godown, to godown, person responsible, vehicle; the lot and the kg moved (its rolls go with it at the lot's average)
Inventory → Godown Stock	Which fabric is in which godown: kg and rolls side by side, and the average kg per roll
Challans and invoices	*From godown*: the godown the goods leave

F Customers, leads and quotations

WHERE	WHAT TO DO
CRM → Customer Master	Name, mobile, address, GSTIN, credit limit, credit days and payment terms
CRM → Leads & Follow-ups	Every enquiry: what they want, stage (new, contacted, quotation sent, negotiation, won, lost). Note each call or visit with the **next follow-up date**
CRM → Follow-ups Due	Leads to call today, overdue first. Due follow-ups also show on the dashboard
CRM → Customer Card	One customer at a glance: outstanding, overdue, sales this year, invoices with paid and balance, payments, open orders, leads

G Money: bank, cash, expenses, bills, EMIs

WHERE	WHAT TO DO
Bank & Cash Accounts	Add each bank account once with its opening balance. *Cash in Hand* is already there
Every receipt, payment, expense, salary, EMI	Choose the mode; the account fills in (cash = Cash in Hand). Change it if the money went through another bank
Payment Receipts and **Supplier Payments**: the details	Each mode asks for its own: **Cheque** – cheque no. (must be filled), cheque date, bank & branch. **UPI** – phone no or UPI ID, transaction ID. **Bank Transfer** – NEFT / RTGS / IMPS, UTR no, their bank (paying a supplier: also their account no & IFSC). **Online** – paid through, transaction ID. **Cash** – who took or got the cash, receipt-book / voucher no

Cheques: they count only once cashed	A cheque does not count until you fill in *Cheque cashed (cleared in bank) on*: the customer still owes it, the bill stays unpaid, the bank balance does not have it. When it shows in the bank statement, open the receipt or payment and fill in that date. **Cheques Not Cashed** lists every cheque still waiting; the dashboard warns about them
Party master: **Bank & UPI**	Save a party's bank, account no, IFSC and UPI ID once; they fill in by themselves on its receipts and payments
Bank Entries	Cash deposited, cash withdrawn, transfer between accounts, bank charges, interest
Bank & Cash Book	The balance of every account; click one for its entries
Bank Reconciliation	When an entry appears in the bank statement, fill in *Cleared in bank on*. The page shows what is not yet in the bank and the balance the bank should show
Expenses	Transport, rent, repairs, office, phone, miscellaneous … Factory expenses tick *Add to production cost* by themselves
Electricity Bills	Enter the bill when it comes (month, amount, due date); fill in *Paid on* when it is paid. Do not enter it again under Expenses
Loans and **EMI Payments**	Each loan once (EMI, number of EMIs, first EMI date); then each EMI as it is paid. **EMI & Loan Status** shows EMIs left and the next due date

> The dashboard warns you about overdue invoices, EMIs and electricity bills due within a few days, late job work and follow-ups due.

H Staff, attendance and salary

WHERE	WHAT TO DO
Staff & Salary → Staff	Name, department, designation, mobile, joining date; salary a month (or wage a day)
Attendance	Once a day: everyone is listed as present; change only those absent, on half day, on leave or off
Salary & Advances	Pick the employee and the month: the salary due from the attendance shows and fills the amount. Give advances here too; recover them in *Advance recovered* on a later salary
Salary Register, **Attendance Sheet**	The month for everyone: days, salary due, paid, balance, advances; and the day-by-day attendance

> Only logins allowed to see salaries see the pay; others (for example a godown supervisor marking attendance) see the staff without it.

I GST reports, approvals and the activity log

WHERE	WHAT YOU SEE
GST Reports	GST summary, sales register, purchase register, GSTR-1 data (B2B, B2C, HSN summary), GSTR-3B summary, party GSTINs. Your accountant should check them before filing
Admin → Approvals	When approval is on (Settings), a change or deletion of a saved entry by staff waits here until the administrator approves it. Staff can still correct their own entries the same day
Admin → Activity Log	Who signed in, and who created, changed, deleted or approved what, and when

J Quick fixes for common messages

YOU SEE	WHY	DO THIS
"no stock here" in **Yarn Issue**	The yarn was never received	Do the **GRN** (step 2), or Opening Stock
An agency is not in **Agency / unit**	Its party record does not tick that work	**Masters** → **Parties**: open the agency and tick the work
"no stock here" in **Knitting**	No yarn was issued to that agency	Do the **Yarn Issue** to that agency (step 4)
Lot missing in **Dyeing**	The knitting entry is not saved yet, or its grey fabric was sent to another agency or kept at the knitter	Check the agency chosen. To move fabric use **Inventory** → **Send Grey for Dyeing**
Chemicals show "no stock" in Dyeing	You chose to supply chemicals, but none were received	Buy them with a **GRN** into the Main Store, or leave the table empty if the agency uses its own
Lot missing in **Finishing**	The lot has not been dyed yet, or the dyed fabric was sent to another agency	Do the **Dyeing** entry (step 6), or check the agency chosen
An item is missing from a list	Wrong category in the item master	**Masters** → **Items**: correct the category
"Not enough stock … short by …"	You entered more than is available	Check the quantity, or the step before
"Sent to the administrator for approval"	Approval is on, and the entry was made by someone else or on an earlier day	Nothing: the change is made when the administrator approves it
"No access"	Your login is not allowed on that screen	Ask the administrator to change your role
"Too many wrong passwords"	5 wrong passwords in a row	Wait 15 minutes, then sign in again

K Who does what

LOGIN	WORKS ON
Purchase	Masters, purchase orders, purchase bills
Store / Inventory	Goods receipts (GRN), yarn issue to the knitting agencies, godown transfers, opening stock
Knitting	Knitting entries for each agency's delivery (the grey fabric goes to the dyeing agency chosen on the entry); send grey for dyeing; status updates
Dyeing / Color	Dyeing entries for each dyeing agency; status updates
Finishing & Packing	Finishing entries for each finishing agency; status updates
Sales	Customers, leads & follow-ups, quotations, price list, sales orders, challans, invoices
Finance & Accounts	Purchase bills, supplier and agency payments, customer receipts, bank & cash, expenses, electricity bills, EMIs, staff & salaries, GST reports
Management / Admin	Everything, including the business dashboard and its alerts. Admin also manages users, settings, approvals and the activity log

Finding a choice fast: every dropdown (customer, supplier, item, lot, agency, account, report filters …) is also a search box. Click it and type any part of the name, for example *kolk* or *jersey 30*: only matching choices stay. ↑ ↓ to move, **Enter** or **Tab** to pick, **Esc** to go back.

Saving: press **Ctrl** + **S** or click **Save**. Your sign-in belongs to your own browser tab; close the tab or click the sign-out icon at the bottom of the menu when you leave the computer.
