Majumdaar Hosiery ERP

Staff Handbook

How to fill in the master lists, and how material moves through the ERP from buying yarn to finished rolls in the store, explained step by step with one real example.

CONTENTS

1. **Masters**: what they are and the order to fill them
2. Units
3. Locations
4. Items (materials and products)
5. Parties (suppliers and customers)
6. Machines
7. Processes (labour rates)
8. BOM / Recipes
9. Party Price List
10. **Workflow**: yarn purchase to finished rolls, 7 steps
11. What the ERP shows you at the end
12. Selling the finished lot
13. Quick fixes for common messages
14. Who does what

For all staff using the ERP

Boxes marked * must be filled in

PART 1

Masters: the fixed lists

Masters are the lists the ERP uses everywhere: your materials, your customers and suppliers, your machines. Fill them in once; after that every screen lets you pick from a list instead of typing, and rates, GST and labour fill in automatically.

Fill them in this order (each one uses the ones before it)

1. **Units**: already filled (Kg, Nos, Roll…). Add only if you need a new one.
2. **Locations**: the 4 main places are already there.
3. **Items**: all your materials and products.
4. **Parties**: suppliers and customers.
5. **Machines**: knitting and dyeing machines.
6. **Processes**: labour rates (3 are already there; set your real rates).
7. **BOM / Recipes**: dye recipes and packing standards.
8. **Party Price List** (under Sales): special prices for customers.

Who can fill Masters: Admin, Management, Purchase, Sales and Data Entry logins. Factory logins (Knitting, Dyeing, Finishing, Store) can see the lists but cannot change them.

1 Units

How you count things. Already there: **Kg, Nos, Roll, Mtr, Ltr, Pcs, Box**.

Masters → Units → + New unit

BOX	WHAT TO WRITE	EXAMPLE
Symbol *	Short form	*Dz*
Unit name	Full name	*Dozen*

2 Locations

The places where stock is kept. Stock is always counted **per place**, so the ERP knows how much yarn is in the store and how much is at the knitting unit.

ALREADY THERE (CANNOT BE DELETED)	WHAT IS KEPT THERE
Main Store	Yarn, dyes & chemicals, packing material as received
Knitting Factory	Yarn issued for knitting, grey fabric just knitted
Color Factory	Grey fabric waiting to be dyed, dyed fabric waiting to be finished
Finished Goods Store	Packed rolls ready to sell

Add a new location only for another godown, or an outside job worker who holds your material.

Masters → Locations → + New location

BOX	WHAT TO WRITE	EXAMPLE
Location name *	The place	*Howrah Godown*
Type	Store, Factory or Job Worker	*Store*
Remarks	Anything useful	*Extra yarn storage*

3 Items: materials and products

Every material you buy, make or sell, from yarn and dyes to the finished rolls you sell.

Masters → Items → + New item

BOX	WHAT TO WRITE	EXAMPLE
Item code	Your own short code (optional, but handy for searching)	*Y30*
Item name *	Full name, the way you say it	*Cotton Yarn 30s Combed*
Category *	What kind of material; see the next table. **Very important.**	*Yarn*
Unit *	How you count it	*Kg*
HSN code	From the supplier's bill or your CA	*5205*
GST %	Its GST rate	*5*
Standard rate (₹)	Usual price. Fills in purchase orders (bought items) or invoices (products)	*245*
Re-order level	Optional. Shows a **Low** alert when stock falls below this	*500*
Description	Quality details, if any	*100% cotton, combed*

The category decides where the item shows up

CATEGORY	PUT HERE	IT APPEARS IN
Yarn	All yarns: cotton, lycra, silk…	Purchase, yarn issue, knitting
Dyes & Chemicals	Dyes, soda ash, salt, softener	Purchase, dyeing, dye recipes
Packing Material	Poly bags, paper tubes, tape	Purchase, finishing & packing, packing recipes
Others	Anything else you buy	Purchase
Grey Fabric	Fabric straight off the knitting machine	Knitting output, transfer, dyeing input
Colored Fabric	Fabric after dyeing	Dyeing output, finishing input
Finished Goods	Packed fabric you sell	Finishing output, sales order, challan, invoice

Create the whole chain for every product you make. For example: Cotton Yarn 30s (**Yarn**) → Grey Single Jersey 30s (**Grey Fabric**) → Dyed Single Jersey 30s (**Colored Fabric**) → Finished Single Jersey 30s (**Finished Goods**).

Creating an item does not add stock. Stock comes in through **Purchase → Goods Receipt (GRN)** when you buy, or **Inventory → Opening / Adjustment** for stock you already have.

4 Parties: suppliers and customers

Everyone you buy from or sell to.

Masters → Parties → + New party (or Customers → Customer Master: same list)

BOX	WHAT TO WRITE	EXAMPLE
Party name *	Business name	*Kolkata Garments Pvt Ltd*
Type *	**Supplier** (you buy from them) · **Customer** (you sell to them) · **Job Worker** (does work for you) · **Both**	*Customer*
Contact person	Who you talk to	*Mr. Sen*
Phone / Email	Contact details	*+91 98300 12345*
State *	Pick from the list. **Decides the GST type**	*West Bengal*
GSTIN	Their 15-character GST number; leave empty if unregistered	*19AAACK4444D1Z4*
City / Address	Printed on invoices and challans	*Kolkata*

Credit limit (₹)	Customers: the most they may owe you	*5,00,000*
Credit days	Customers: days they get to pay	*30*
Opening balance (₹)	What was owed when you started using the ERP	*25,000*
Dr / Cr	**Dr** = they owe you · **Cr** = you owe them	*Dr*

Why State and GSTIN matter: same state as you → the invoice charges **CGST + SGST**; another state → **IGST**. The first two digits of a GSTIN must match the state code (West Bengal = 19); the ERP warns you if they don't. When an invoice would take a customer above their **credit limit**, the ERP asks you to confirm before saving.

5 Machines

Your knitting and dyeing machines. Picking a machine in a knitting entry lets the ERP show **output per machine**.

Masters → Machines → + New machine

BOX	WHAT TO WRITE	EXAMPLE
Machine code *	Your own number	*KM-01*
Description	What it is	*Single Jersey 30" 24G*
Used for	Knitting, Dyeing, Finishing or Other	*Knitting*
Diameter / Gauge	Machine dia and needle gauge	*30" / 24G*
Feeders	Number of feeders	*90*
Capacity	Output per day or per batch	*350 kg/day*
Status	Running, Idle or Under maintenance	*Running*

6 Processes: labour rates

The labour rate you pay per kg for each stage. The ERP uses it to **calculate labour automatically**, and that labour goes into your **cost per kg**. Already there: Knitting ₹8/kg, Dyeing ₹15/kg, Finishing & Packing ₹6/kg. **Change these to your real rates.**

Masters → Processes

BOX	WHAT TO WRITE	EXAMPLE
Process name *	Name	*Knitting*
Stage *	Knitting, Dyeing or Finishing	*Knitting*
Labour rate (₹/kg)	What you pay per kg	*8*

STAGE	LABOUR IS WORKED OUT AS
Knitting	rate × **kg of grey fabric produced**
Dyeing	rate × **kg of grey fabric put in**
Finishing	rate × **kg of finished fabric**

You can always change the labour amount in a particular entry, for example to a fixed lump sum.

7 BOM / Recipes

A standard list of materials **for 1 kg of fabric**. Picking a recipe in a dyeing or finishing entry fills in all the dyes, chemicals or packing for you, multiplied by the kg.

Masters → BOM / Recipes → + New recipe

BOX	WHAT TO WRITE	EXAMPLE
Recipe name *	A name you'll recognise	*Red Reactive Recipe*
Stage *	**Dyeing** (dye recipes) or **Finishing** (packing standard)	*Dyeing*

For output item	The fabric it produces (optional)	*Dyed Single Jersey 30s*
Expected wastage %	Normal loss, for reference	*3*
Materials per 1 kg	One line per material, with the quantity for **1 kg** of fabric	*see below*

EXAMPLE DYE RECIPE: ITEM	QTY PER 1 KG	FOR 585 KG THE ERP FILLS IN
Reactive Red ME4BL	0.03	17.55 kg
Soda Ash	0.1	58.5 kg
Glauber Salt	0.5	292.5 kg
Silicone Softener	0.02	11.7 kg

Only these appear in recipes: Dyes & Chemicals, Packing Material and Others. Yarn is entered directly in each knitting entry.

8 Party Price List

Special prices for particular customers. When you make a sales order or invoice for that customer, **their rate fills in automatically**.

Sales → Party Price List → + New price

BOX	WHAT TO WRITE	EXAMPLE
Customer *	Pick the customer	*Kolkata Garments Pvt Ltd*
Item *	A Finished Goods item	*Finished Single Jersey 30s*
Rate (₹/kg) *	Their price	*420*
Effective from	Date the price starts	*01-10-2026*

When a price changes, **add a new line with the new date**; the ERP always uses the latest. Customers without a special price get the item's standard rate.

Good to know

- **No duplicates.** Two items, parties or machines cannot have the same name; the ERP tells you if one exists.
- **Used records cannot be deleted.** Once an item or party is used in an entry it is protected. You can still **edit** it (spelling, phone number…).
- **Changes apply going forward.** A new rate, GST % or labour rate affects new entries; saved entries keep their values.
- **Search and sort:** every list has a search box; click a column heading to sort.

PART 2

From yarn purchase to finished rolls

One real example all the way through: you buy **1,000 kg** of Cotton Yarn 30s, knit **600 kg** of it, dye it **Red**, and end up with **560 kg / 24 rolls** of finished fabric.

The material moves through four places, one entry at a time

Main Store
yarn, dyes, packing

Knitting Factory
yarn → grey fabric

Color Factory
grey → dyed fabric

Finished Goods Store
finished rolls

#	STEP	WHO DOES IT	WHAT HAPPENS
1	Purchase Order	Purchase	You order yarn from the supplier
2	Goods Receipt (GRN)	Store	Yarn arrives at the **Main Store** and gets its **lot number** (L-0001)
3	Purchase Bill	Purchase / Accounts	Supplier's bill recorded (money only)
4	Yarn Issue to Knitting	Store	Yarn sent to the **Knitting Factory**
5	Knitting	Knitting	Yarn becomes **grey fabric** with the **same lot number**, and goes **straight to the Color Factory**
6	Dyeing	Dyeing	Grey becomes **coloured fabric**
7	Finishing & Packing	Finishing	Coloured becomes **finished rolls** in the Finished Goods Store

Golden rule: each step can only use what the **previous step** put there. If a list says "**no stock here**", the step before it has not been done yet.

One lot number, start to finish: the ERP gives the lot number **once, on the GRN** (L-0001, L-0002 …). Nobody types it. Yarn issue, knitting, dyeing, finishing and the challan all pick that same number from a list, so lot L-0001 is the same lot from the supplier's yarn to the customer's invoice.

Before you start: the items in the example must exist in Masters → Items (Cotton Yarn 30s = Yarn, Grey Single Jersey 30s = Grey Fabric, Dyed Single Jersey 30s = Colored Fabric, Finished Single Jersey 30s = Finished Goods, plus your dyes, chemicals and packing). Add the supplier in Masters → Parties.

1 Purchase Order

Purchase · optional but recommended

Purchase → Purchase Orders → + New

BOX	FILL
Supplier	Shree Spinning Mills
Item line	Cotton Yarn 30s · Qty **1000**. Rate and GST fill in by themselves

STOCK AFTER THIS STEP

Nothing moves yet	It is only an order

2 Goods Receipt (GRN): yarn arrives

Store

Purchase → Goods Receipt (GRN) → + New

BOX	FILL
Supplier	Shree Spinning Mills
Against PO	Pick the PO. The lines fill in by themselves
Lot no	Nothing to type. It shows *new on save*, and the yarn gets **L-0001** when you save. Dyes, chemicals and packing show *no lot*
Received at	**Main Store**
Supplier challan no	From their delivery paper

STOCK AFTER THIS STEP

Main Store	**1,000 kg** Cotton Yarn, lot **L-0001**

Buy your **dyes, chemicals and packing material** the same way (steps 1 and 2). They are needed in steps 6 and 7.

3 Purchase Bill: money only

Purchase / Accounts

Purchase → Purchase Bills → + New

Pick the supplier, type their **bill number** and choose **Against GRN**. Lines and GST fill in by themselves. This records what you **owe** the supplier; it does not move any stock.

4 Yarn Issue to Knitting

Store

Inventory → Yarn Issue to Knitting → + New

BOX	FILL
Item	Cotton Yarn 30s
Yarn lot	**L-0001 — 1000 Kg** (the list shows what is in the Main Store)
Qty (kg)	**600**

STOCK AFTER THIS STEP

Main Store	400 kg yarn
Knitting Factory	**600 kg** yarn, lot L-0001

5 Knitting: yarn becomes grey fabric

Knitting

Production → Knitting → + New

BOX	FILL
Machine / Shift	KM-01 · Day
Yarn consumed	Cotton Yarn 30s · lot **L-0001** · **600 kg**
Lot no	Fills in by itself from the yarn: **L-0001**. With two yarns (e.g. cotton + Lycra) it takes the lot of the one with the most kg
Grey fabric produced	Grey Single Jersey 30s
Output qty (kg) / Rolls	**585** / **25**
GSM / Dia	160 / 30" (optional)
Grey fabric goes to	Already set to **Color Factory (ready to dye)**. Leave it

The ERP fills in by itself:

- **Wastage** 600 − 585 = **15 kg** (2.5%). Change it if the real waste was different.
- **Labour** ₹8 × 585 kg = **₹4,680**.

STOCK AFTER THIS STEP

Knitting Factory	Yarn used up (600 kg)
Color Factory	**585 kg / 25 rolls** grey fabric, lot **L-0001**, ready to dye. **No transfer entry needed**

Holding fabric at the knitting unit? Choose **Knitting Factory** in "Grey fabric goes to". Send it later with **Inventory → Transfer to Color Factory**.

6 Dyeing: grey becomes coloured

Dyeing

Production → Dyeing / Coloring → + New

BOX	FILL
Grey fabric	Grey Single Jersey 30s
Lot no	**L-0001**. Input qty fills in as **585**
Color / Shade	Red
Dye recipe	Pick one (e.g. Red Reactive Recipe). Dyes & chemicals fill in by themselves for 585 kg, taken from the **Main Store**
Colored fabric produced	Dyed Single Jersey 30s
Output qty (kg)	**570**

The ERP fills in by itself: wastage **15 kg**, labour ₹15 × 585 = **₹8,775**.

STOCK AFTER THIS STEP

Color Factory	**570 kg** dyed fabric, lot L-0001 (Red)
Main Store	Dyes & chemicals reduced by what was used

7 Finishing & Packing: finished goods (roll / kg)

Finishing

Production → Finishing & Packing → + New

BOX	FILL
Colored fabric	Dyed Single Jersey 30s
Lot no	**L-0001**. Input qty fills in as **570**
Finish	Compacting (or your finish)
Packing materials	Poly bag **24**, paper tube **24** (or pick a packing recipe)
Finished goods produced	Finished Single Jersey 30s
Output qty (kg) / Rolls	**560** / **24**
Meters	**2200** (optional; gives you cost per meter)
Quality	A

The ERP fills in by itself: wastage **10 kg**, labour ₹6 × 560 = **₹3,360**.

FINAL STOCK

Finished Goods Store	**560 kg / 24 rolls** Finished Single Jersey, lot **L-0001**, ready to sell

Done: 600 kg of yarn has become **560 kg / 24 rolls** of finished fabric, lot **L-0001**. That is a **93.3% yield**, with 40 kg of wastage recorded across the three stages.

PART 3

Results, selling and quick fixes

Where to see what the lot cost and where it is, how to sell it, and what to do when the ERP shows a message.

A What the ERP shows you at the end

WHERE TO LOOK	WHAT YOU SEE
Inventory → Stock Summary (Finished Goods Store)	560 kg / 24 rolls, lot L-0001, with its value
Costing → Lot Costing Sheet	The exact cost of lot L-0001: yarn + dyes + packing + all labour + overheads + wastage = **cost per kg, per roll, per meter**
Production → Batch / Lot Tracking	Lot L-0001 from the supplier's GRN (1,000 kg received) → 600 kg yarn knitted → 585 grey → 570 dyed → 560 finished = **93.3% yield**, then kg sold and kg left
Wastage → Wastage Report	Knitting 15 kg, dyeing 15 kg, finishing 10 kg, with their value

For accurate costing also enter each month's power bill, rent, maintenance and similar costs in **Costing → Overhead Entries**. The ERP spreads them over the kilograms finished that month.

B Selling the finished lot

#	SCREEN	WHAT TO DO
1	**Sales → Sales Orders**	Customer and quantity. The rate fills in from the Party Price List. The ERP warns you if the customer's credit limit would be crossed
2	**Sales → Delivery Challans**	Pick the sales order; pending quantity fills in. Choose lot **L-0001** and the rolls sent. Stock leaves the Finished Goods Store
3	**Sales → Invoices**	Pick the challan; everything fills in. GST is worked out automatically (CGST + SGST or IGST). Click **Print** for the tax invoice
4	**Customers → Payment Receipts**	When the customer pays: amount, mode (bank, UPI, cheque) and reference number

C Quick fixes for common messages

YOU SEE	WHY	DO THIS
"no stock here" in **Yarn Issue**	The yarn was never received	Do the **GRN** (step 2), or Opening Stock
"no stock here" in **Knitting**	Yarn not issued to the knitting factory	Do the **Yarn Issue** (step 4)
Lot missing in **Dyeing**	The knitting entry is not saved yet, or "Grey fabric goes to" was set to Knitting Factory	Save the **Knitting** entry (step 5); for fabric held at the knitting unit use **Inventory → Transfer to Color Factory**
Chemicals show "no stock" in Dyeing	Dyes and chemicals never received	Buy them with a **GRN** into the Main Store
Lot missing in **Finishing**	The lot has not been dyed yet	Do the **Dyeing** entry (step 6)
An item is missing from a list	Wrong category in the item master	**Masters → Items**: correct the category
"Not enough stock … short by …"	You entered more than is available	Check the quantity, or the step before
"No access"	Your login is not allowed on that screen	Ask the administrator to change your role
"Too many wrong passwords"	5 wrong passwords in a row	Wait 15 minutes, then sign in again

D Who does what

LOGIN	WORKS ON
Purchase	Masters, purchase orders, purchase bills
Store / Inventory	Goods receipts (GRN), yarn issue to knitting, opening stock
Knitting	Knitting entries (the grey fabric goes to the Color Factory by itself)
Dyeing / Color	Dyeing entries
Finishing & Packing	Finishing entries
Sales	Customers, price list, sales orders, challans, invoices
Finance & Accounts	Purchase bills, supplier payments, customer receipts, overheads, reports
Management / Admin	Everything, including the business dashboard. Admin also manages users and settings

Saving: press **Ctrl + S** or click **Save**. Your sign-in belongs to your own browser tab; close the tab or click the sign-out icon at the bottom of the menu when you leave the computer.
